Online regression markets with
varying feature space

DTU Wind-M-0784

July 2024

ECTS: 32,5

Education: Master of Science

Supervisors:

Jalal Kazempour

Thomas David Falconer

DTU Wind & Energy Systems

Remarks:

This report is submitted as partial fulfillment of the requirements for graduation in the above education at the Technical University of Denmark.

DTU Wind & Energy Systems is a department of the Technical University of Denmark with a unique integration of research, education, innovation and public/private sector consulting in the field of wind energy. Our activities develop new opportunities and technology for the global and Danish exploitation of wind energy. Research focuses on key technical-scientific fields, which are central for the development, innovation and use of wind energy and provides the basis for advanced education at the education.
